# Technical Analysis for Financial Markets (Level II - Advanced)

## Programme Directors

**Dr Smita Roy Trivedi**

**Prof Yashveer Singh Rawat**

National Institute of Bank Management

# Introduction

Technical Analysis is an important tool that helps the market participants understand markets and trade profitably. By focusing on price action and psychology of the market participants, it helps to separate the noise from the actual data and make a more informed decision thus making the dealers more confident.

We focus on a comprehensive coverage of the most important technical analysis tools: Trend Analysis, Candlestick Patterns, Ichimoku, Point and Figure, Moving Averages, Momentum, Stochastics, Elliot Waves, Time Cycles. The programme also covers the Back testing of Strategies and Algorithmic Trading. The focus will be on application of technical analysis: with pertinent and live examples of trade setups and making use of macroeconomic and market data, including derivatives data.

# Objectives

- Provide participants with comprehensive knowledge of technical analysis approaches with case studies.
- Help participants in advanced application of technical and news analysis tools with appropriate trade setups for effective trading.
- Help participants navigate volatile market with focus on INR trading.
- Familiarize participants with back testing of trading strategies and basics of algorithmic trading.

# Contents

- Dow Theory, Trend analysis, Fibonacci and Moving Averages
- Advanced analysis of Chart Patterns
- Candlestick and their effective use
- Ichimoku analysis
- Momentum Indicators & their interpretation
- Volatility Indicators and Stochastics
